

Prof. Lionel Rostaing

Nephrologist, Immunologist
Consultant in Clinical Transplantation
At GRENoble University Hospital
POLE DIGIDUNE –
Clinique de Néphrologie
CS 10217
38043 Grenoble cedex 09
FRANCE

N° Inscription à l'Ordre des Médecins de l'Isère : n° 38/11482
N° RPPS 10002868668
N° Adeli 311078489
Tel: +33 476 768 945
Cell: +33 674 046 719
Fax: +33 476 765 263
E.mail: lrostaing@chu-grenoble.fr
Date of birth: 24/01/1959
Nationality: French

QUALIFICATIONS

1978: Graduated from high school (BAC)
1984: Graduated from Grenoble University Medical School
1988: Doctor of Medicine (Toulouse University Medical School)
1988: Graduated in Nephrology at Toulouse University Medical School
1989: Graduated in Immunology at Aix-Marseille University Medical School
1990: Assistant Physician in Clinical Haematology (Toulouse University Hospital)
1991-1993: Assistant Physician in Nephrology, Dialysis, Transplantation (Toulouse University Hospital)
1994-1998: Consultant in the Organ Transplant Service (Toulouse University Hospital)
1999: Professor of Nephrology
2000: Ph. D

09-2008/01-2016: Head of Department of Nephrology, Dialysis and Organ Transplantation, Toulouse University Hospital, France

Since 02-2016: Head of Department of Nephrology, Haemodialysis, Apheresis, and Kidney Transplantation, Grenoble-Alpes University Hospital, France

Overseas Fellowships:

1988: One month at the Collaborative Transplant Study (CTS), under Prof. G. Opelz, Heidelberg (Germany)

1989: One year at UK Transplant Services, in Bristol, UK, under Prof. B. Bradley

Main fields of clinical and basic research:

- Pretransplant desensitization in the setting of ABO incompatible and/or HLA incompatible kidney transplantation.
- Hepatitis C virus (HCV) infection in dialysis and transplant patients: prevalence; impact on liver function and histology; treatment.
- Hepatitis E virus (HEV) in transplant patients: prevalence, impact upon liver function and histology; treatment.
- Prophylaxis of cytomegalovirus infection/disease after renal or liver transplantations
- Pharmacokinetics and pharmacodynamics of immunosuppressants
- Evaluation of new immunosuppressive therapies, such as Belatacept
- Assessment of intracytoplasmic cytokines by means of flow cytometry: relevance to alloreactivity in renal transplant recipients, to biocompatibility in haemodialysis patients.

Member of Scientific Societies:

- ☐ Société Francophone de Néphrologie (1992)
- ☐ Société Francophone de Transplantation (1993)
- ☐ International Society of Nephrology -ISN- (1997)
- ☐ European Society of Dialysis, Transplantation, and Nephrology –EDTA- (1997)
- ☐ American Society of Nephrology–ASN- (1997)
- ☐ American Transplant Society –ATS- (1997)
- ☐ European Society of Organ Transplantation–ESOT- (1999)
- ☐ European Society of Artificial Organs-ESAO- (2012)
- ☐ International Society for Apheresis-ISFA- (2014)

Bibliography: (co)author of more than more than 540 articles.
